

DynamicDebugText.AddDebugItem

DynamicDebugText.RemoveDebugItem

DynamicDebugText.UpdateSpacing

```
graph LR; A[DynamicDebugText.AddDebugItem] --> C[DynamicDebugText.UpdateSpacing]; B[DynamicDebugText.RemoveDebugItem] --> C;
```

The diagram illustrates a dependency or call relationship. Two methods, 'DynamicDebugText.AddDebugItem' and 'DynamicDebugText.RemoveDebugItem', are shown on the left. Arrows from both of these methods point to a third method, 'DynamicDebugText.UpdateSpacing', which is highlighted with a gray background. This suggests that both 'AddDebugItem' and 'RemoveDebugItem' require 'UpdateSpacing' to be called or updated.
